Chief, Planning and Review Staff, ORR

19 June 1956

THRU : Chief, Industrial Division

Deputy Chief, Shipbuilding Branch, ORR

Project 35.516, Shipbuilding Industry of Rumania, Recommended  
Cancellation

1. The completed draft of the subject project contains production estimates which appear to be possibly valid only for the year 1955. Estimates for even this one year appear to be tenuous.

2. The lack of firm information in this report is attributed to both the scarcity and quality of available reports on the subject. These same problems were found to exist when preparing the MIS on Shipbuilding in Bulgaria.

3. Current reports, possibly as result of requirements imposed, are becoming more numerous and apparently of higher quality.

4. In view of the above it is recommended that:

- a. The subject project be cancelled
- b. The draft of the report be retained in I/SH files to be used as the basis for current requirements pending (c)
- c. Collation of pertinent information be continued and the project be re-established when the quantity and quality of the material indicates such action to be feasible.
